FIND VOLCANO IN MINDANAO Recent Eruption Was Apparent, Lieu-tenant Donnelly Says of the

Discovery. Mindanno has a new-volcano, accord-Ing to the Mindamo Herald. Lieutenant Donnelly, while on a like into the Interior of Lanzo province, discovered

an active volcano in the Piagayungan range of mountains, which heretofore was not known to exist. Lieutenant Donnelly says of his discovery in the "June 5, 1916, the undersigned, in

command of a combined detachment of the First Combato company, and the First General Service company, on reconnoissance patrol from Kapaad morthwest through the Plagayungan mountain range, came in sight of an nctive volcane which from all indica- his first enlistment, under ordinary tions had recently erupted a discharge of volcanic ash and either smoke or

"From the fact that foliage in the forest on the mountain sides three miles to the southeast had been secrebed as though by flame, hot smoke or toxic gas, and that ground vegetation of scrub grass and weeds had been partially destroyed, leaving The stalks intuct and the scorched leaves retaining their form, it was thought that the cruption had been recent. At all events, so recent that the wind had not blown away nor destroyed the fragile remnants of the Burned follage,"

Avoiding Litigation, and the far West mayor to the English tourist, "I dunno how you manage these affairs over there, but out here, when some of our boys got tied up in that thar bankrupt telephone company I was tellin' yer about, they Recame mighty crusty."

"Yus; they didn't like the way the receiver was handling the business no-

"Indeed!" commented the earnest listener. "Then, may I ask what they

"Sartinly; I was goin' ter tell yer. They just hung up the receiver."

"There's a Reason"

GET RICH IN NAVY

POSSIBLE FOR ENLISTED MEN TO RETIRE WITH FORTUNE.

In Addition He Can Have Income of \$104 a Month for Rest of His Life If He Has Served Thirty Years.

There are other advantages to being an American tur than having a wife in every port, if we are to believe the conversation picked up around a recruitng station. And, strangely enough, it is the idea of growing rich, one of the thoughts furthest from the minds of the ordinary man entering the navy, which seems to be the greatest drawing card. At least that looms largest in the minds of the men who are doing the recruiting. There is a glamour to the tar's life, a romance to his adventures. Moreover, the chance to go about the globe and see something of foreign shores is alluring to many, even though it is sandwiched in between endless decks to wash and eternul brosses to polish. In the Harris burg Telegraph a recruiting officer tells of the financial advantage of going into greatly to the man who is without reconsibility, and to whom the prospect ever having stacked up \$30,000 is classed along with owning a flying car-pet and other such tales of the unreal. Our recruiting officer says:

"Do you want to retire at the age of tifty with \$28,788.70, and have on income of at least \$104 a month for the remainder of your life?

"If you do, join the United States

"The American sailors are the best paid in the world, and after thirty ears of service the man-o'-warsman retired on a pay of not less than \$100 a month, and, in addition, should have saved \$28,788,70 from his monthly pay

A young man enlisting at the age of

eighteen as an apprentice seaman will be paid \$17.60 a month during six months spent at training station and receive an increase to \$20.00 a month when he boards a ship. By the end of course of advancement, he should be receiving \$33 a month, and meanwhite he is outfitted with clothes and all he cessities. If he re-callsts within four months after the expiration of his first enlistment, he will receive a sevendollar monthly increase in pay, and a bonus of four months' pay in addition. If by the end of his second enlistment he should have received a good-conduct medal (which adds 83 cents a month to his pay), he should be receiving \$55 a month. After twelve years he should have reached chief betty efficer's pay with a salary of \$90.62 a month, and thereafter his pay is increased with each enlistment. Good-conduct and other medals for meritorious services also add to his pay. Under ordinary courses, according to the figures furhished by the navy department, a sallo usually saves one-half of his pay which is deposited in the ship's bank, receiving 4 per cent interest. beginning at the lowest level in the navy and reaching the highest point in the service as an enlisted man the end of twelve years and continuing in this enpacity for sixteen years, the average sailor retires after thirty years of service with a pension of \$104 month, besides having the \$28,000 or more in addition.

Grass in Paper-Making.

In England there is a large use of a "Lenguel Wombat has bought a fine | Spanish grass called esparto as a di Must be using to court an old-fash-fash thisties were made into paper luent for rag paper stock in making England. A Wonderful Maze.

At Waltham, Mass., there is a maze in the gardens of Hampton Court palce, near London. It is a winding and enfusing group of paths, bounded by high hedges; there are 1,000 trees which were planted in 1896. The total length of all the paths is about one-third of a mile, and the shortest path to the central pool is about ongfifth of a mile. It sometimes takes visitors more than an hour to find their way to the center; sometimes they give up and call for help in finding their way out.

At one of the "tryout" vaudeville houses a young girl had just made her appearance as a "single" dancing There was a good deal of genuine applause for her efforts. She made her exit and stood in the wings recovering her breath. The manager of the theater approached her. "Very good," said he. "You went very well, indeed. But why don't you smile? You never smiled once."

"If I smiled," she answered, gasping, "I'd forget my routine. I'll smile tomorrow night."—Cincinnati Times-

DOAN'S RIDNEY FOSTER-MILBURN CO., BUFFALO, N.Y.

India will improve cattle breeding. Women Once Invalids

Now in Good Health Through Use of Lydia E. Pinkham's Vegetable Compound. Say it is Household Necessity. Doctor Called it a Miracle.

All women ought to know the wonderful effects of taking Lydia E. Pinkham's Vegetable Compound even on those who seem hopelessly ill. Here are three actual cases:

Harrisburg, Penn.—"When I was single I suffered a great deal from female weakness because my work compelled me to stand all day. I took Lydia E. Pinkham's Vegetable Compound for that and was made stronger by its use. After I was married I took the Compound again for a female trouble and after three months I passed what the doctor called a growth. He said it was a miracle that it came away as one generally goes under the knife to have them removed. I never want to be without your Compound in the house."—Mrs. Frank Knobl, 1642 Fulton St., Harrisburg, Penn.

Hardly Able to Move.

Albert Lea, Minn.—"For about a year I had sharp pains across my back and hips and was hardly able to move around the house. My head would ache and I was dizzy and had no appetite. After taking Lydia E. Pinkham's Vegetable Compound and Liver Pills, I am feeling stronger than for years. I have a little boy eight months old and am doing my work all alone. I would not be without your remedies in the house as there are none like them."—Mrs. F. E. Yost, 611 Water St., Albert Lea, Minn.

Three Doctors Gave Her Up.

Pittsburg, Penn.-"Your medicine has helped me wonderfully. When I was a girl 18 years old I was always sickly and delicate and suffered from irregularities. Three doctors gave me up and said I would go into consumption. I took Lydia E. Pinkham's Vegetable Compound and with the third bettel began really. bottle began to feel better. I soon became regular and I got strong and shortly after I was married. Now I have two nice stout healthy children and am able to work hard every day."—Mrs. Clementina Duerring, 34 Gardner St., Troy Hill, Pittsburg, Penn.

All women are invited to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special advice,—it will be confidential.

What Woman Could? "It is said that Napoleon used to wipe his pens on his white trousers."

ART OF ANCIENT CHETANS

It Was Very Different From That of Early Egyptian Times, Says Writer in Century.

"There could hardly be a stronger contrast than that between the contemporaneous arts of Crete and Egypt, for it is a contrast in fundamental as well as in superficial qualities. Cretan art is not monumental; it is an art of small things—of things so often small in idea as well as in material scale. that genre is the term that best describes them. Again, in its most characteristic planses, Cretan art is not conventionalized, but is singularly unrammeled, naturalistic, And its spirit, Its aims. Its themes, are not grave and writes Mrs. Schuyler Van Rensselner in the Century.

"In Crete there were no great temples, but closely built towns and wide-iy extended, tall palaces of innumerable rooms, passages, and courts. There were no great stone coloniades or sculptured walls. The few stone dumns that remain, with indications that there were many more of wood, ere poor and plain in ferm. Generally the walls were plastered and painted, and often the paintings with human figures were very small in scale. In to material did the Cretans attempt arge works of sculpture in the round, nor, despite their naturalistic tenden cies, did they practice that art of por-tralture wherein Egypt excelled. On the other hand, we marvel at their shill when we look at their small figures and reliefs, sometimes of stone, more often of ivory, metal, or pottery, at their engraved gems, and their mlays, exquisitely wrought with crystal, ivory, colored paste, and the precious metals. We know from Mycenne what the Egean goldsmith could do, and there is proof that he did as well in the mother island at a much earfier time. In decorated pottery the Cretan did much better than the Egyptian, and almost the only things that he seems to have cared to make impressive by reason of their size are his jars of pottery and

PECAN ONLY NUT CULTIVATED

But the Black Walnut Offers Wonderful Opportunities Almost Anywhere in Northern States.

The pecan is about the only indigenous American nut that has been extensively cultivated; although the members of the Northern Nut Growers' association are studying the black wais all the records,-Havard Lampoon... nut, the shagbark bickory, the butternut and the hazelnut with a view to promoting their cultivation. The common black wainut is an especially good example of a valuable tree badly neg-Throughout the north and middle Atlantic states and well inland it grows with the greatest ease and bears heavy crops of nuts. The tree itself is also of the greatest value and of fairly rapid growth for a hardwood, An orchard of black walnut seedlings would begin to bear mus in 10 or 12 years, and in time would become a very valuable bit of timber. There are few better trees to plant; yet they seldom are planted.

The black walnut itself is finely flav ored, but the shell is very thick, and often after the nut is cracked open it is still almost impossible to extract the kernel. In this regard, however, the nuts from different trees vary greatly. The men who are trying to develop the black walnut as an orchard tree seek the wild trees that bear good, ing." thin-shelled fruit, and graft cuttings of selective grafting, a thin-shelled "I wouldn't marry any man on black walnut may be produced in the course of time, just as the famous "patur shelled"; "I get you," replied the practical to the practical transfer of the selective grafting.

New and Useful Metal.

In locating bits of metal, French surgeons use an electro-vibrator, but this sets up oscillations in ordinary surgical instruments as well as in the fragment sought, and non-metallic Instru-ments have been found necessary. Bergonle and Guillaume report that fronnickel alloys as a material offer diffi-culties of manufacture. A more suitable metal has been found in so-called "baros," which has been used for weights of precision, and Is 90 per cent nickel, the remainder consisting of chromium, manganese, and a little copper. It works like mild steel, is practically unexidizable, and is not affected by magnetic vibrations,

Asked and Answered.

"Give woman the credit she deserves," howled the suffragette spenker, "and where would man be?" "If she was to get all the credit she desires," answered the man in the trians by trying to show him how fast gailery, who was evidently married, my car can go." 'he would be in the poorhouse."

Japan's Rising Cotton Trade.

Japan's exports of cotton yarn have shown a large increase since the latter part of last year. According to the Japan Chronicle, repert of investigations made by the Spinning associa-tion, exports of various cotion cloths amounted in value to \$23,415,072. This figure is unprecedentedly large and shows an increase of \$4,123,467 over the amount for the preceding six months and \$10,966,488 over that of the corresponding period last year. The highest rate of increase was seen in the exports to India, followed by the exports to Siberia, while the exports to the Philippines decreased by about one-half, as compared with the preceding half year,

By-Product Coke Oven. The iron industry of this country has been adopting the by-product cok-

ing process at a marvelous rate. There are practically no by-product coke plants in the United States, which do not recover ammonin, tur and light oil (crude benzol). In the vast majority of the plants dso surplus gas is recovered and util-

zed either at the plant itself or by listribution to outside consumers. There are possibly two or three very small by-product coke plants at which tar and ammonia are not recovered for disposal to the outside markets, but ese would certainly represent coniderably less than I per cent of the total by-product coking capacity of the country that is not now equipped with benzol-recovery plants, and the y-product coking plants now under struction have either contracted for benzol-recovery equipment or indicated a strong probability that such provision will be mude.—Metallurgical and Chemical Engineering.
